

# BASIC FLOW METER KIT CHEMICAL FLOW RATES

DESIGNED BY BAYER FOR EXCLUSIVE USE  
WITH RH SEED TREATING SYSTEMS

## Flow Meter Kit-80495684

Designed to display chemical flow (current flow rate and totalized volume) from up to four flow meters to the treater.

### Features & Benefits

- Compact in-line design promotes accurate use of seed treatment products, stewardship and sustainability
- Each component is precision tuned to work in tandem
- All contact components are stainless steel construction
- Works in conjunction with calibration beaker installed on CBP Tanks
- Flow meter is mag inductive
- Flow meter color display
- Commercial grade dust tight enclosure
- Standard 115V 3-prong power cord (8 FT)
- 4 flow meter cable ports
- 15 FT quick connect communication cable

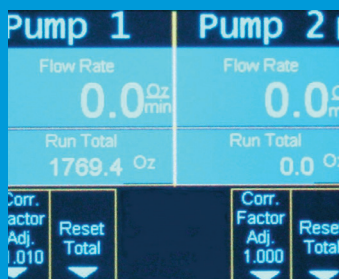

### CALIBRATION

- Outside factors such as temperature, humidity, elevation, etc., may affect calibration.
- Recommended to calibrate whenever seed variety, seed type or treatment media changes.

## PRODUCT DETAILS: OPTIONS

### 1) Flow Meter Display

- Digital display provides real-time feedback
- Totalized treatment volume applied to seed
- Correction factor easily adjusted
- Up to 4 flow meter ports
- Easy navigation between 4 flow meter displays
- Seed treatment product is calibrated by volume
- Easy on-step calibration adjustment on the display

### 2) Flow Meter

- Helps prevent costly spills due to hose malfunction
- Flow meter communicates with flow meter display
- Easy cleaning and maintenance - brushes included
- Cost effective and quality design - low cost replacement meters

### 3) Easy Installation

- Mount the flow meter assembly on the CBP tank stand
- Mount the digital display on the RH treater frame or remote on wall

### VALUE ADDED FEATURES

- Easy field installation
- Stainless steel mount bracket
- Components are modular for easy exchange
- High quality construction for industrial use
- 20' tubing included with kit
